If you are not the named recipient or an agent responsible for delivering it to the named recipient, you are hereby notified that you have received this document in error and that review, dissemination or copying of this communication is prohibited. If you have received this communication in error, please notify us immediately by telephone and return the original documents to us by mail. Thank you

**COMMENT:**

The interview requested for Monday afternoon, January 10, 2005, is with respect to the aspect of the claim wherein the intermediate node transmits instructional code to the user machine. The user machine at the user location receives this instructional code and, as a result thereof, is "forced" to be connected to the location associated with the information in the instructional code. This is a "push" operation wherein all of the control is provided at the resource server. Thus, anyone controlling the operation of an overall system would be able to control the operation of the display at the user location merely by receiving a unique code which had no dialing information embedded therein and the purpose of which is to identify a product or an individual.

I will be in Washington on Monday, January 10 and my cell phone number is 972-670-8813.
